

NANTHA KUMAR V

Frontend Software Engineer — React.js | Next.js | WordPress | AI-Integrated Workflows

+91 89401 95501 | vnanthakumar00@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 4 years of experience across WordPress, React.js, and Next.js, comfortable adapting across stacks and picking up new tools quickly. Delivers full-cycle work — responsive React UIs, WordPress theme/plugin builds, performance and SEO optimization, and production deployment (cPanel, Plesk, Windows IIS) — while also mentoring junior developers and building AI-integrated workflows (MCP connections to Notion, Google Workspace, and Gmail) that have measurably doubled personal output on recurring tasks. A self-directed learner who is always looking for the next tool, framework, or workflow worth mastering.

EXPERIENCE

WordPress Developer — Bright Bridge Info Tech *Jul 2024 – Present*

- Developed 12+ custom responsive WordPress websites using PHP, JavaScript, Tailwind CSS, Elementor, and Advanced Custom Fields (ACF).
- Built 3 React.js websites for internal and client use — 2 with dynamic, data-driven pages and 1 static marketing site — handling component structure, routing, and API-driven content.
- Mentored and trained 2 interns on WordPress and PHP fundamentals, running structured onboarding, pairing sessions, and code reviews to bring them to independent contribution.
- Integrated AI tools into daily workflow via MCP — connecting Notion, Google Workspace, and Gmail for documentation, task tracking, and reporting — measured to cut time on recurring tasks by roughly 2x.
- Built custom WordPress plugins and reusable theme components to speed up repeat project setup.
- Optimized website performance using lazy loading, image compression, caching, and Core Web Vitals best practices.
- Collaborated with UI/UX designers, QA engineers, and backend developers to deliver production-ready web solutions.
- Managed application deployments across Windows IIS, cPanel, and Plesk — including DNS, SSL certificates, migrations, and release support for UAT and production environments.

Freelance WordPress & Frontend Developer — Self-Employed (Part-Time) *Jan 2023 – Present*

- Designed and developed custom WordPress, WooCommerce, and Shopify websites tailored to client business requirements.
- Delivered a 4-month Next.js project for a client business web application, working with page routing, API integration, and server-rendered pages.
- Optimized website performance and technical SEO using Google Lighthouse, Core Web Vitals, structured data, sitemap configuration, and page speed enhancements.
- Integrated third-party APIs, payment gateways, contact forms, analytics, and marketing tools.
- Managed website migration, hosting, SSL/DNS configuration, backups, and ongoing maintenance, including bug fixes and feature updates.

Product Developer — 6Storage *Aug 2022 – Jul 2024*

- Developed WordPress websites using Elementor, ACF, PHP, HTML, CSS, and JavaScript.
- Customized WordPress themes and plugins based on client requirements.
- Managed hosting environments using cPanel and Plesk, including deployments, SSL, backups, and maintenance.
- Maintained Umbraco CMS websites, improving responsiveness and usability.
- Worked closely with QA and design teams to deliver high-quality client websites.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, SCSS, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Bootstrap, AJAX, jQuery

AI Tools & Workflow Integration: MCP-based integration of AI tools with Notion, Google Workspace, and Gmail; structured, token-efficient prompting; Google Cloud APIs; workflow automation for documentation and reporting

Backend: PHP, MySQL, REST API, JSON

CMS: WordPress, Custom Theme Development, Custom Plugin Development, WooCommerce, Elementor, Advanced Custom Fields (ACF), Umbraco CMS

Deployment & Hosting: Windows IIS, cPanel, Plesk, DNS Management, SSL Certificates, Website Migration, FTP/SFTP, UAT & Production Deployment

Tools: Git, GitHub, Figma, Adobe Illustrator

Optimization: Core Web Vitals, Google Lighthouse, Technical SEO, Accessibility, Responsive Design

Leadership & Adaptability: Mentoring and training junior developers, cross-stack adaptability, self-directed learning, problem-solving

EDUCATION

Master of Computer Applications (MCA) — Madurai Kamaraj University, Madurai04/2024 – 09/2026

Bachelor of Computer Applications (BCA) — The American College, Madurai06/2019 – 07/2022

KEY ACHIEVEMENTS

- Delivered 15+ responsive websites across healthcare, SaaS, eCommerce, and business domains.
- Improved Google Lighthouse Performance and Accessibility scores from approximately 40% to 85+ on multiple production websites.
- Mentored and trained 2 interns on WordPress and PHP fundamentals through to independent contribution.
- Cut time spent on recurring documentation and reporting tasks by roughly 2x (measured) by integrating AI tools via MCP with Notion, Google Workspace, and Gmail.
- Continuously expanding technical range — proactively learning new stacks, tools, and AI-driven workflows ahead of project needs.

Area of Interest

- Cloud platforms and infrastructure — actively learning AWS fundamentals
- Google Cloud APIs and platform-level integrations
- Extending AI tools across platforms — connecting AI to existing software and workflows rather than using it in isolation
- Collaborative, knowledge-sharing engineering culture — learning from and contributing to teams that value open exchange
