

NANTHA KUMAR V

Frontend Software Engineer — WordPress | React.js | Next.js

+91 89401 95501 | vnanthakumar00@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 4 years of experience building and shipping WordPress and React-based web applications. Comfortable across the full delivery cycle — custom WordPress theme and plugin development, responsive UI builds in React.js, technical SEO, performance optimization, and production deployment (cPanel, Plesk, Windows IIS). Currently deepening React.js and Next.js expertise through hands-on project work, including a 4-month freelance Next.js build for a business-style web application, alongside day-to-day WordPress and PHP development.

EXPERIENCE

WordPress Developer — Bright Bridge Info Tech *Jul 2024 – Present*

- Developed 12+ custom responsive WordPress websites using PHP, JavaScript, Tailwind CSS, Elementor, and Advanced Custom Fields (ACF).
- Built 3 React.js websites for internal and client use — 2 with dynamic, data-driven pages and 1 static marketing site — handling component structure, routing, and API-driven content.
- Built custom WordPress plugins and reusable theme components to speed up repeat project setup.
- Optimized website performance using lazy loading, image compression, caching, and Core Web Vitals best practices.
- Collaborated with UI/UX designers, QA engineers, and backend developers to deliver production-ready web solutions.
- Managed application deployments across Windows IIS, cPanel, and Plesk — including DNS, SSL certificates, migrations, and release support for UAT and production environments.

Freelance WordPress & Frontend Developer — Self-Employed (Part-Time) *Jan 2023 – Present*

- Designed and developed custom WordPress, WooCommerce, and Shopify websites tailored to client business requirements.
- Delivered a 4-month Next.js project for a client business web application, working with page routing, API integration, and server-rendered pages.
- Optimized website performance using Google Lighthouse, Core Web Vitals, lazy loading, caching, and code refactoring.
- Improved technical SEO through structured data, metadata optimization, sitemap configuration, and page speed enhancements.
- Integrated third-party APIs, payment gateways, contact forms, analytics, and marketing tools.
- Handled website migration, hosting management, SSL/DNS configuration, backups, and ongoing server maintenance.
- Maintained client websites through bug fixes, feature additions, and performance improvements.

Product Developer — 6Storage *Aug 2022 – Jul 2024*

- Developed WordPress websites using Elementor, ACF, PHP, HTML, CSS, and JavaScript.
- Customized WordPress themes and plugins based on client requirements.
- Managed hosting environments using cPanel and Plesk, including deployments, SSL, backups, and maintenance.
- Maintained Umbraco CMS websites, improving responsiveness and usability.
- Worked closely with QA and design teams to deliver high-quality client websites.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, SCSS, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Bootstrap, AJAX, jQuery

Backend: PHP, MySQL, REST API, JSON

CMS: WordPress, Custom Theme Development, Custom Plugin Development, WooCommerce, Elementor, Advanced Custom Fields (ACF), Umbraco CMS

Deployment & Hosting: Windows IIS, cPanel, Plesk, DNS Management, SSL Certificates, Website Migration, FTP/SFTP, UAT & Production Deployment
